EWB CLOUD LABS

STUDENT PROJECT REPORT

EWB AWS VPC Peering Student Project

Name: Amirtha V

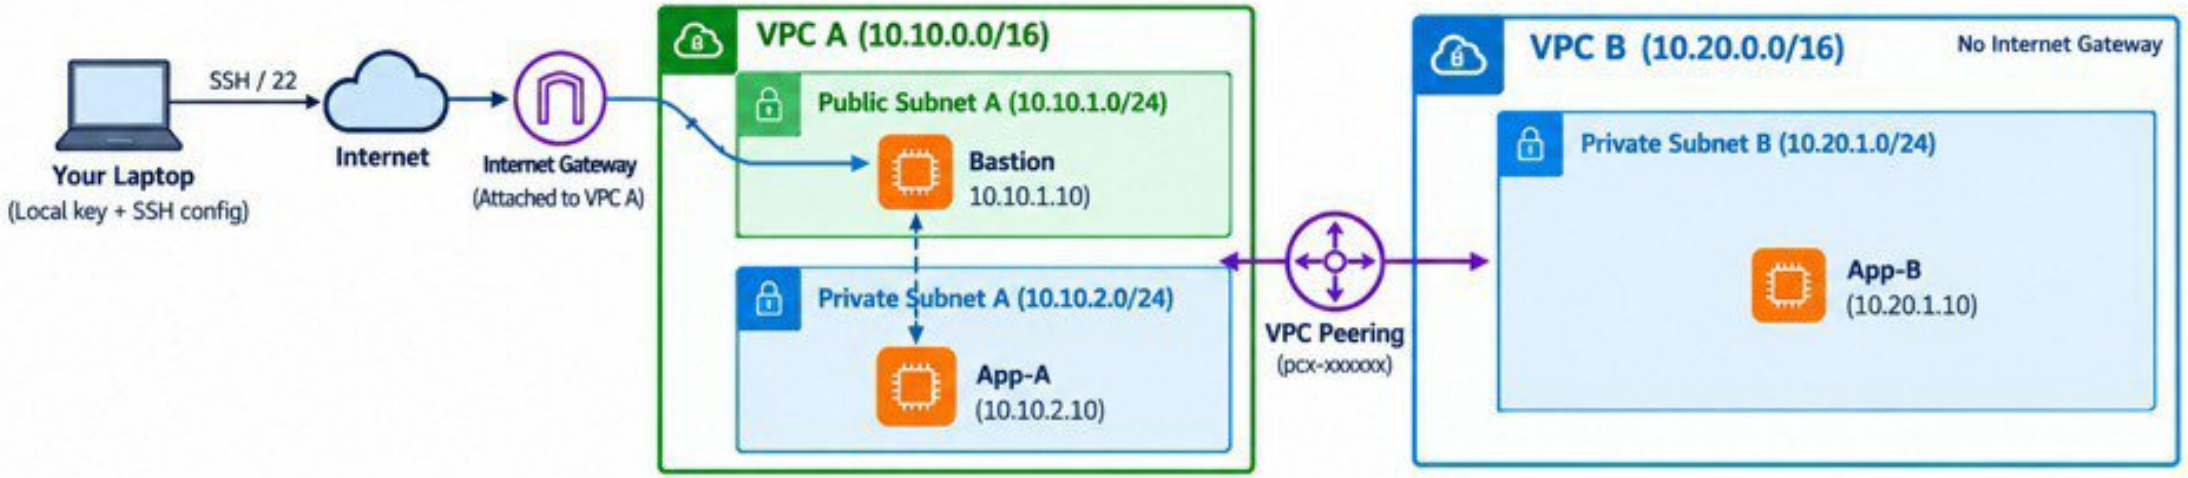

Batch: 1

Project Title: EWB AWS VPC Peering Student Project

Region: eu-north-1

Completion Date: 25/10/2026

AWS VPC Peering – Architecture Diagram

Administration Flow

Laptop → Bastion (SSH/22)
Bastion → App-A / App-B (SSH with ProxyJump)

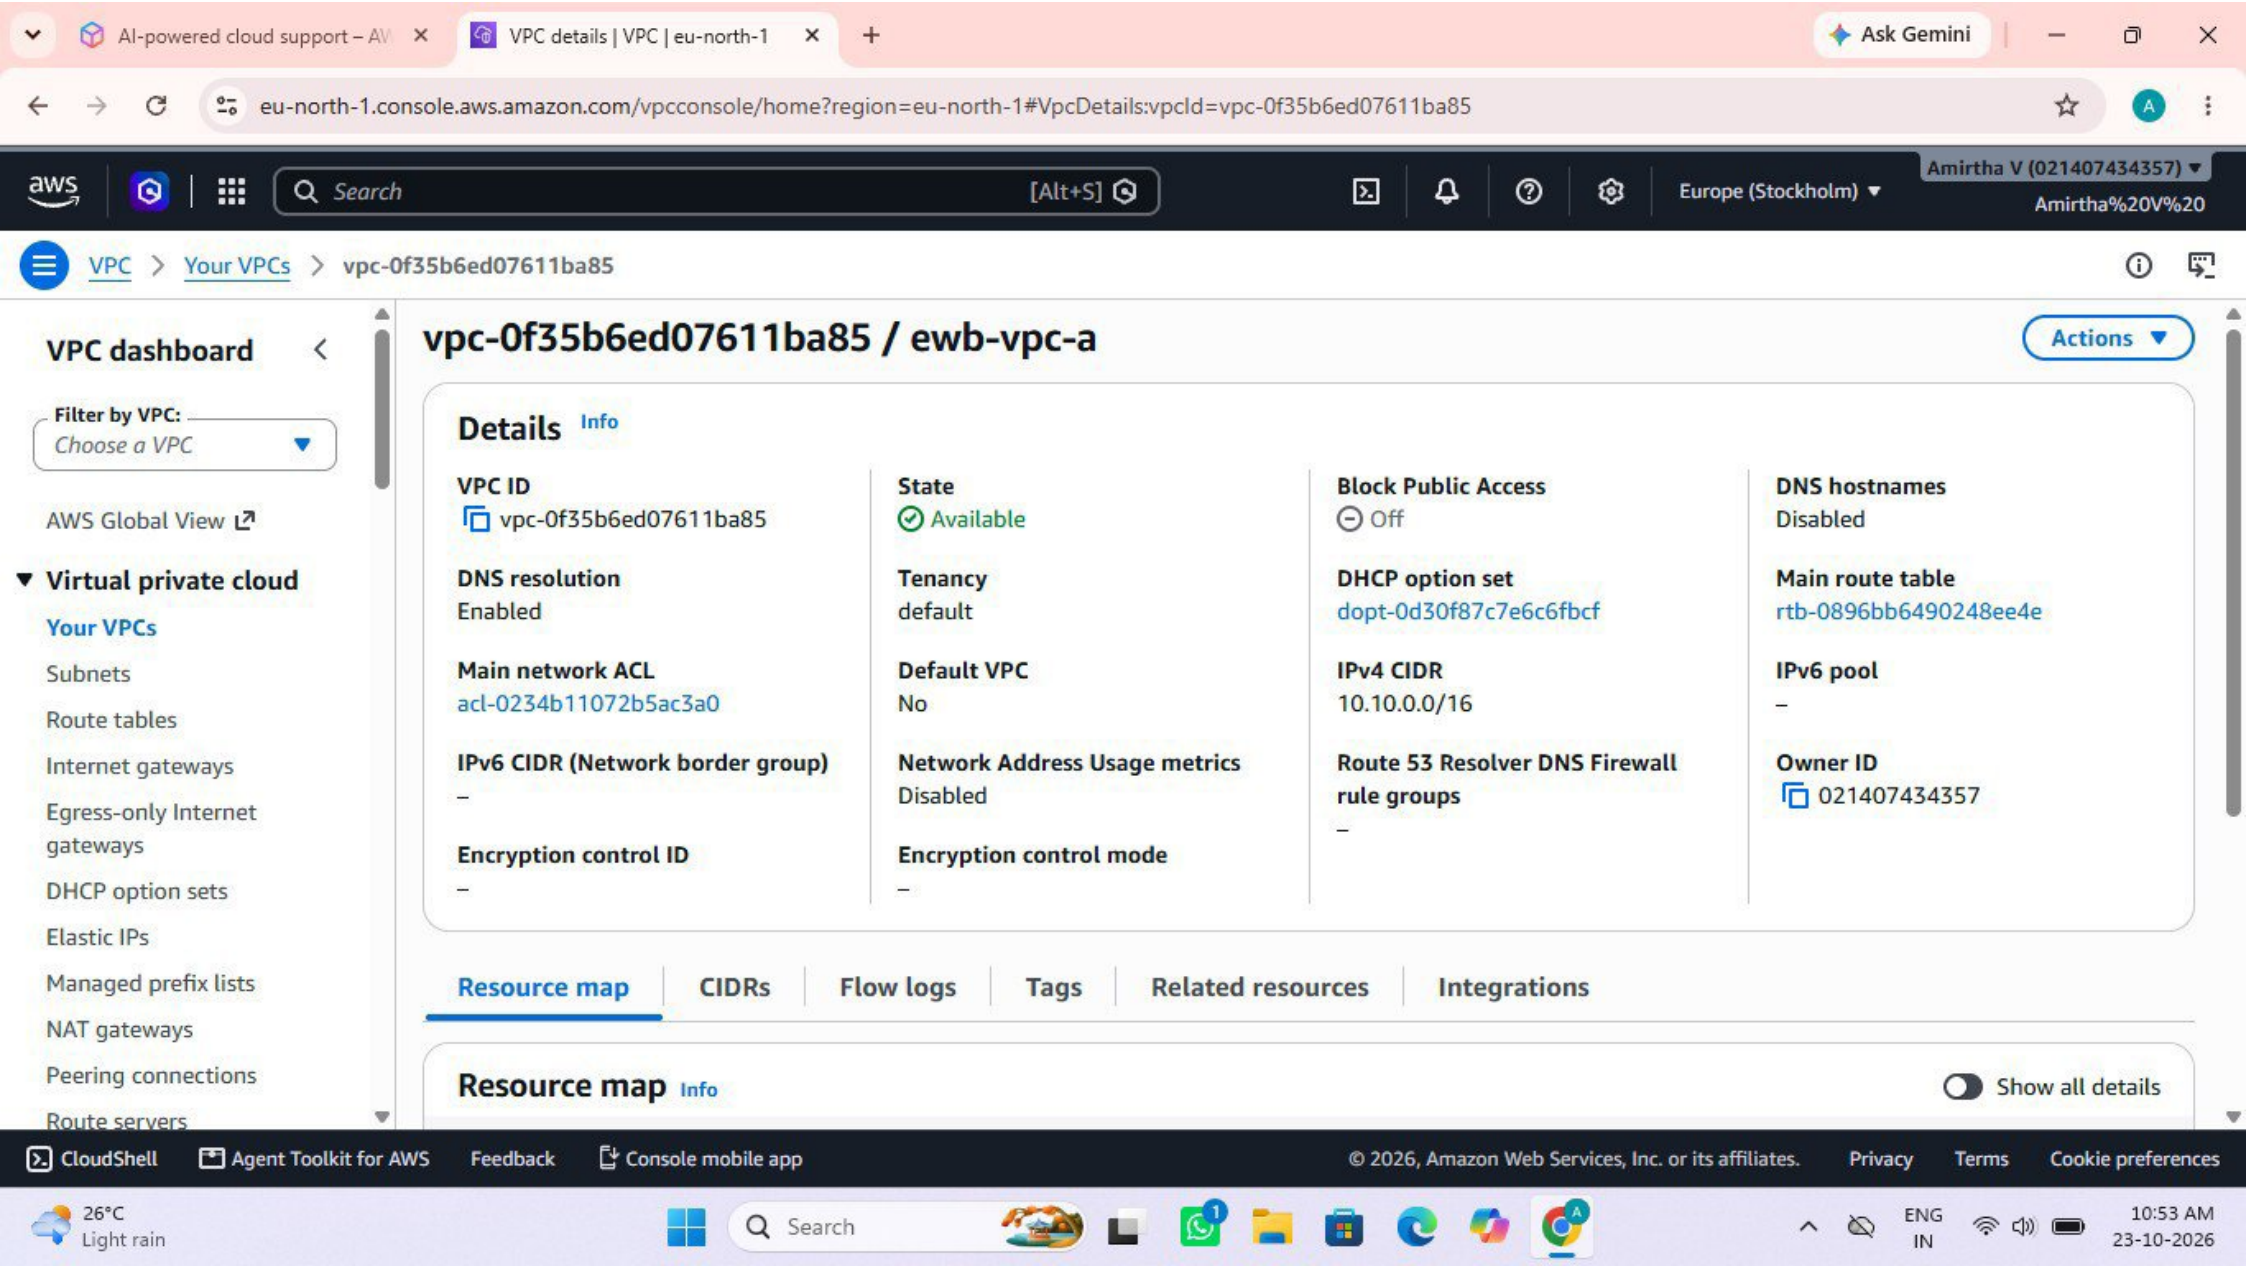

Project Traffic
App-A ↔ App-B
(Private IPs over peering)

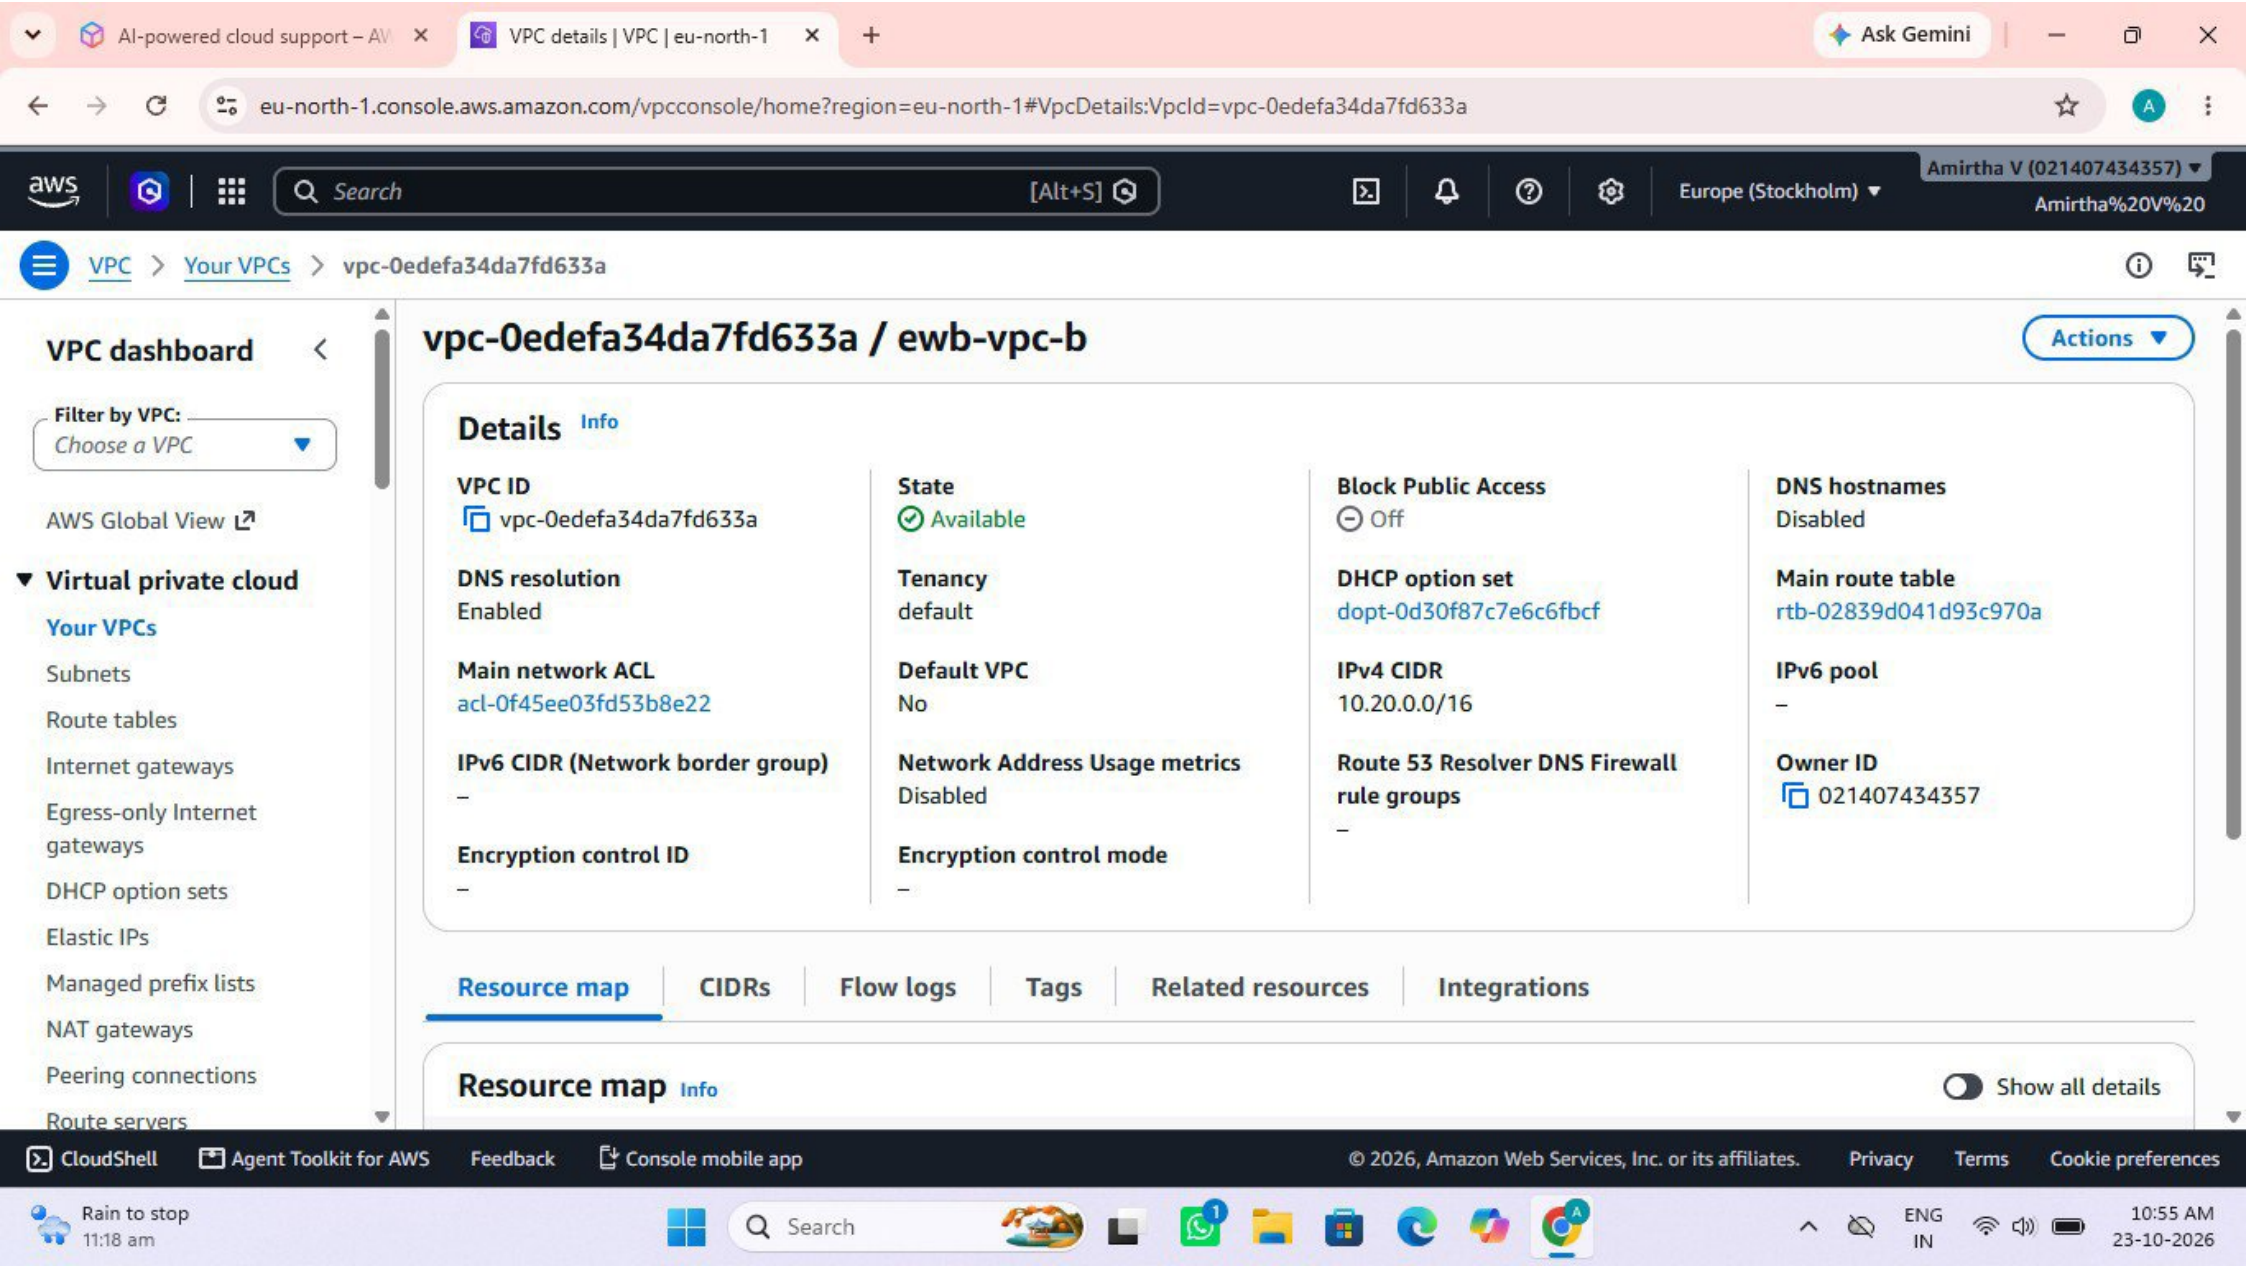

Legend

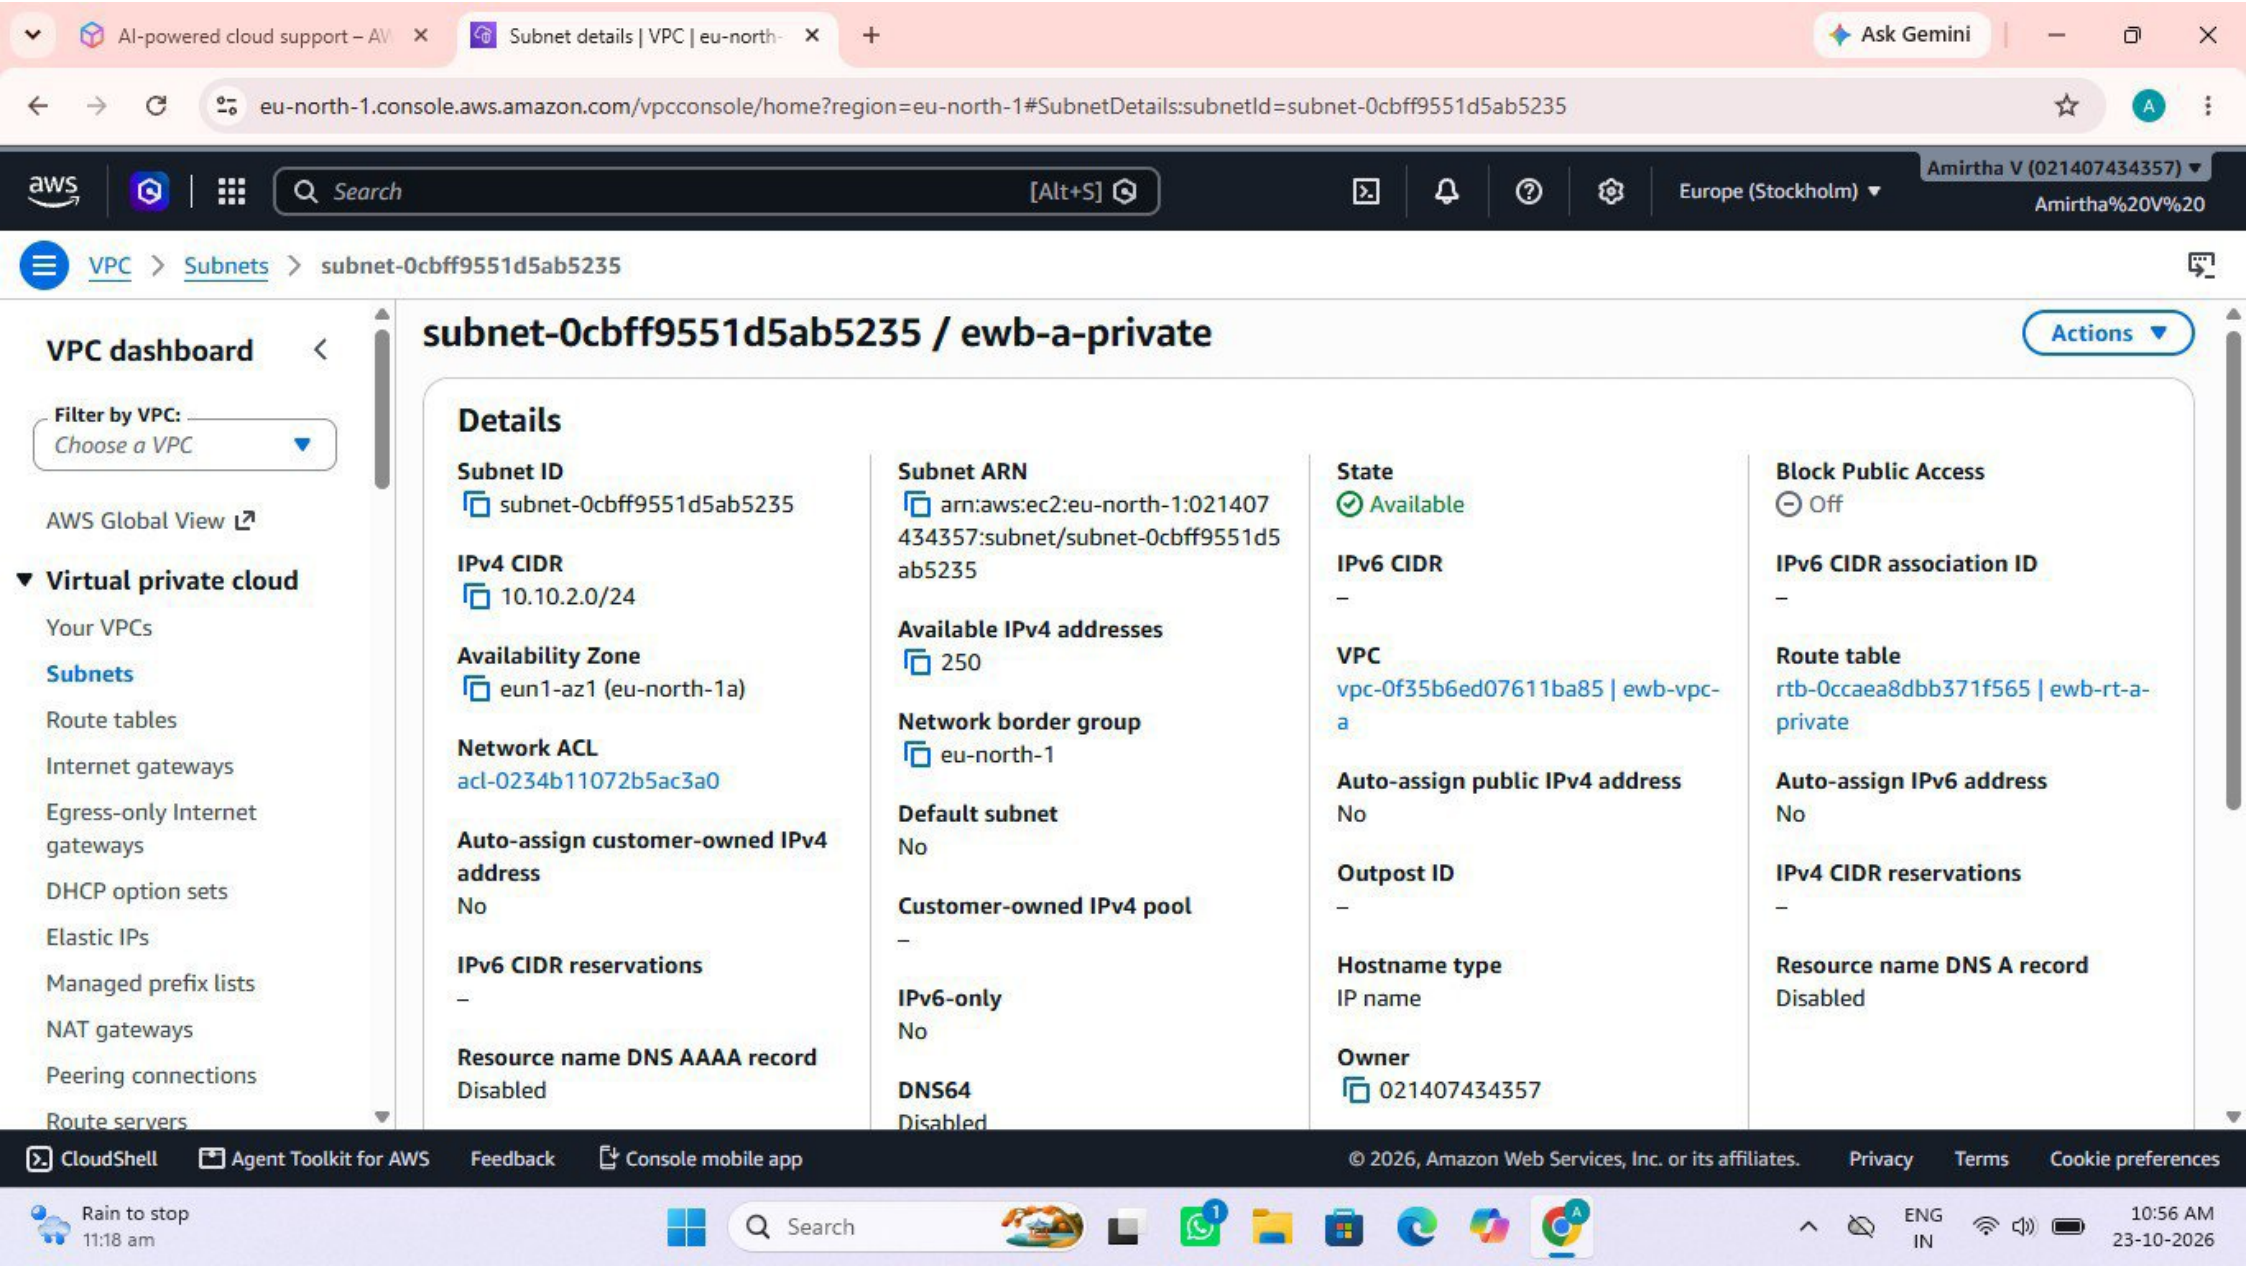

- Public Subnet
- Private Subnet
- Internet Gateway
- VPC Peering Connection

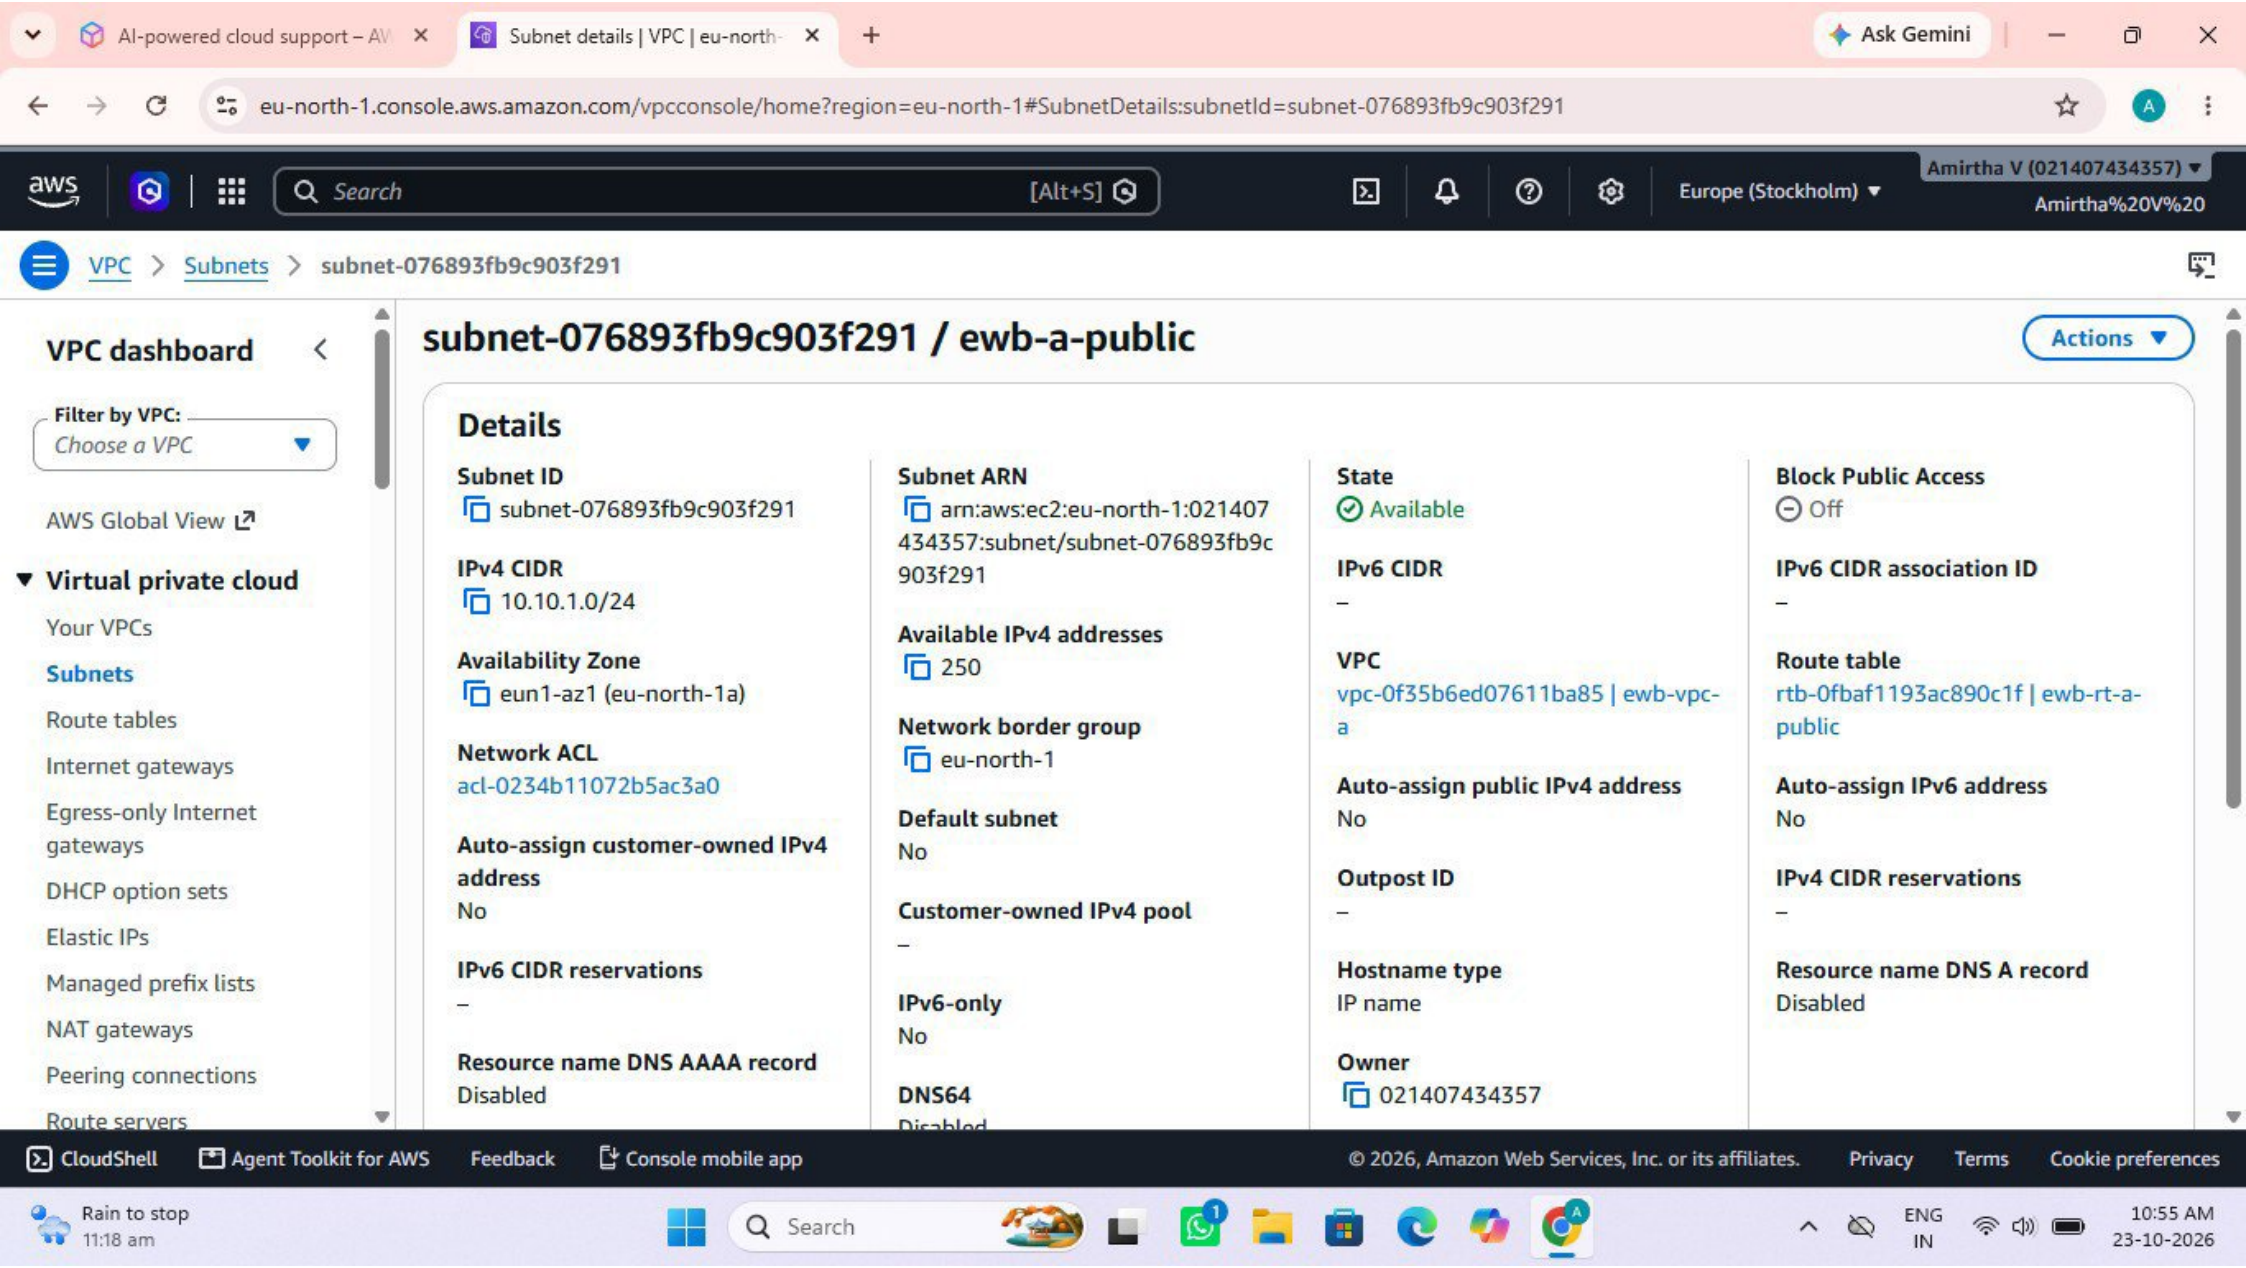

IP Address Plan

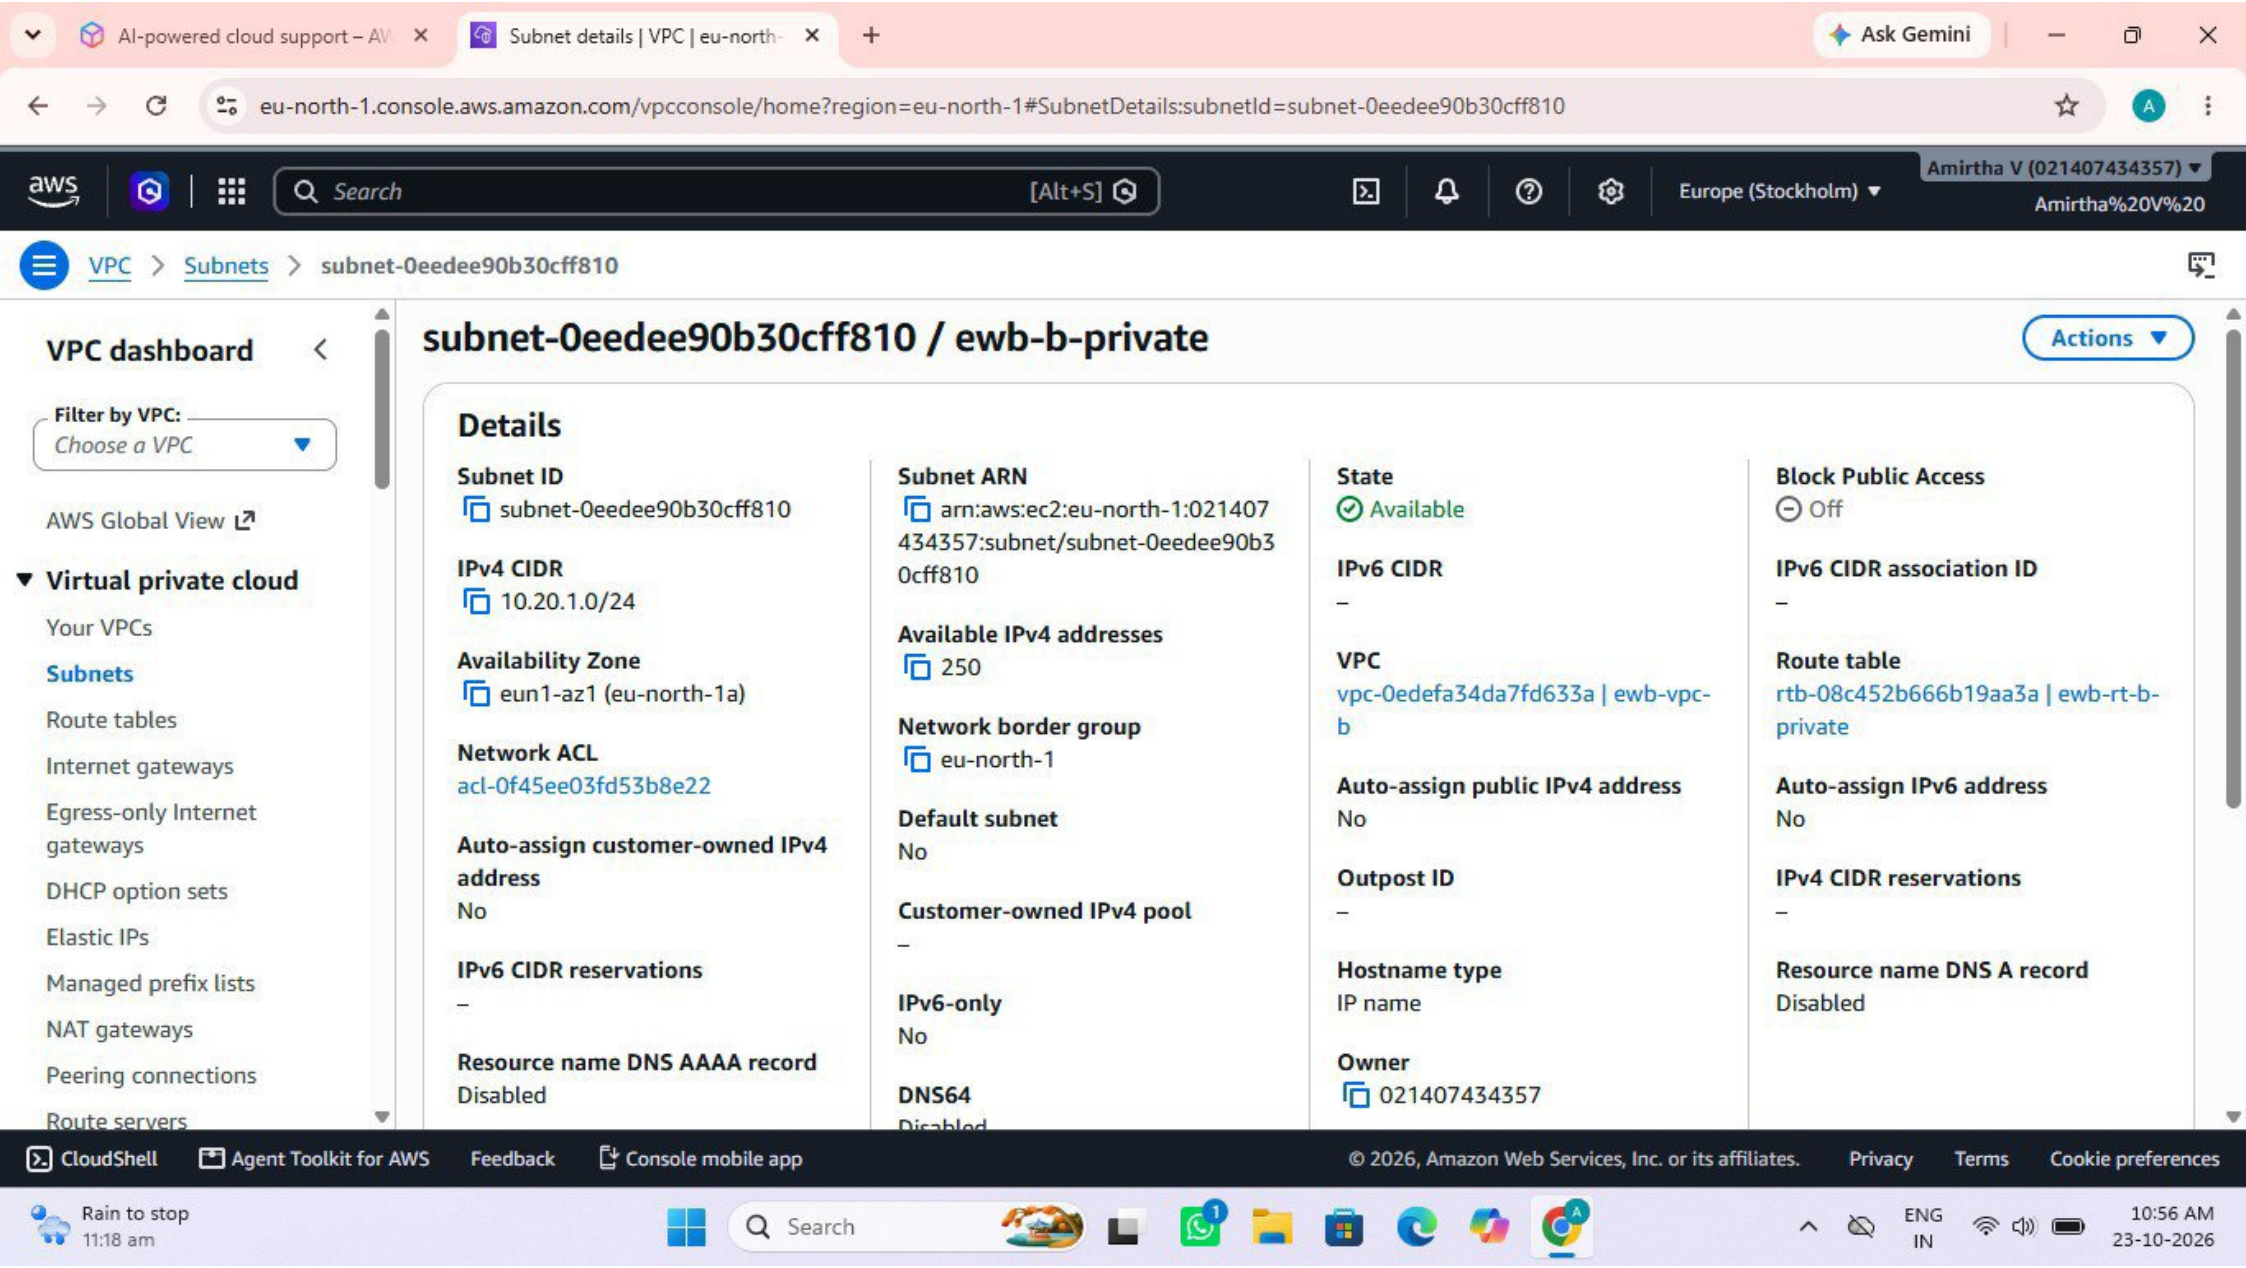

Resource / Name	VPC or Subnet	CIDR / IP Address	Purpose
VPC A (ewb-vpc-a)	VPC A	10.10.0.0/16	Application VPC (with internet access)
VPC B (ewb-vpc-b)	VPC B	10.20.0.0/16	Application VPC (no internet access)
Public Subnet A (ewb-subnet-a-public)	VPC A	10.10.1.0/24	Bastion host subnet
Private Subnet A (ewb-subnet-a-private)	VPC A	10.10.2.0/24	App-A subnet
Private Subnet B (ewb-subnet-b-private)	VPC B	10.20.1.0/24	App-B subnet
Bastion (ewb-bastion)	Public Subnet A	10.10.1.10	Administration access
App-A (ewb-app-a)	Private Subnet A	10.10.2.10	Private workload (VPC A)
App-B (ewb-app-b)	Private Subnet B	10.20.1.10	Private workload (VPC B)

AWS VPC Peering Project

What I Learned

1. AWS Basics

- Learned about AWS global infrastructure and regions.
- Understood the different services and how they work together.
- Explored the AWS Management Console and basic navigation.

2. VPC and Networking

- Created VPCs in two different regions.
- Configured public and private subnets.
- Understood CIDR blocks and IP addressing.
- Learned about internet gateway and how it provides internet access.

3. EC2 Instances

- Launched EC2 instances in both VPCs.
- Configured key pairs for secure login.
- Installed and tested basic connectivity between instances.

4. Bastion Host and SSH

- Set up a bastion host in the public subnet.
- Learned how to connect to private instances using SSH through the bastion host.
- Understood the importance of secure access and limiting direct access.

5. Route Tables

- Created and configured route tables for both VPCs.
- Added routes for the subnets and internet gateway.
- Learned how routing works within a VPC and between peered VPCs.

6. Security Groups

- Configured inbound and outbound rules for EC2 instances.
- Allowed specific traffic like SSH and ICMP (ping).
- Understood how security groups control traffic at the instance level.

7. VPC Peering

- Created a VPC peering connection between the two VPCs.
- Learned the requirements and limitations of VPC peering.
- Understood how to update route tables and security groups for cross-VPC communication.

8. Testing and Verification

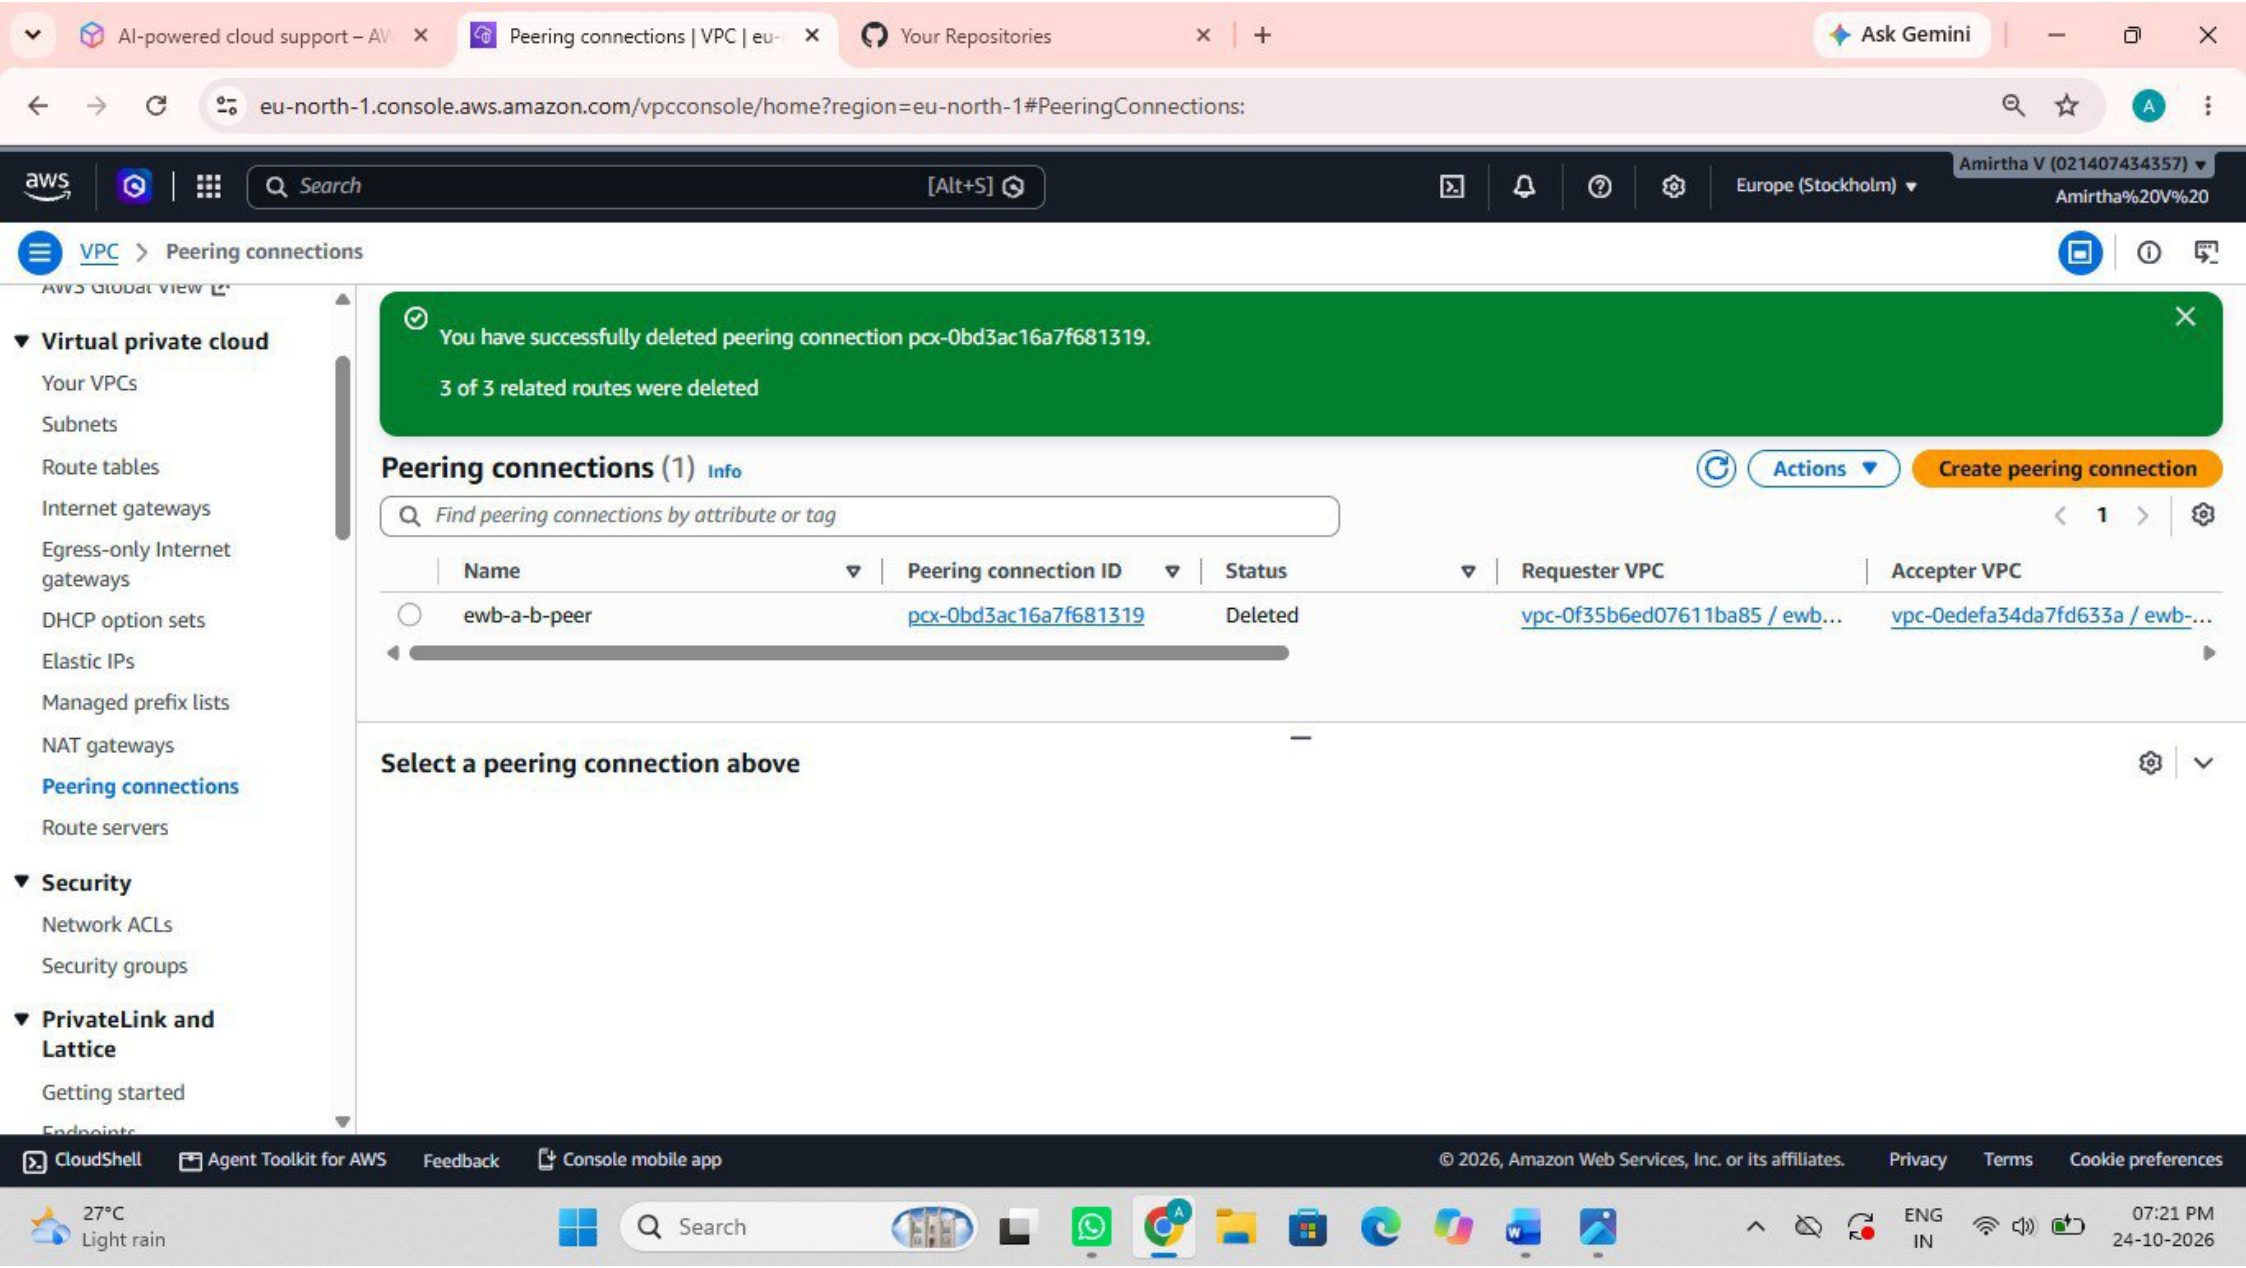

- Used ping to check connectivity between instances in different VPCs.
- Verified SSH access through the bastion host.
- Checked the route tables and security group rules when facing issues.

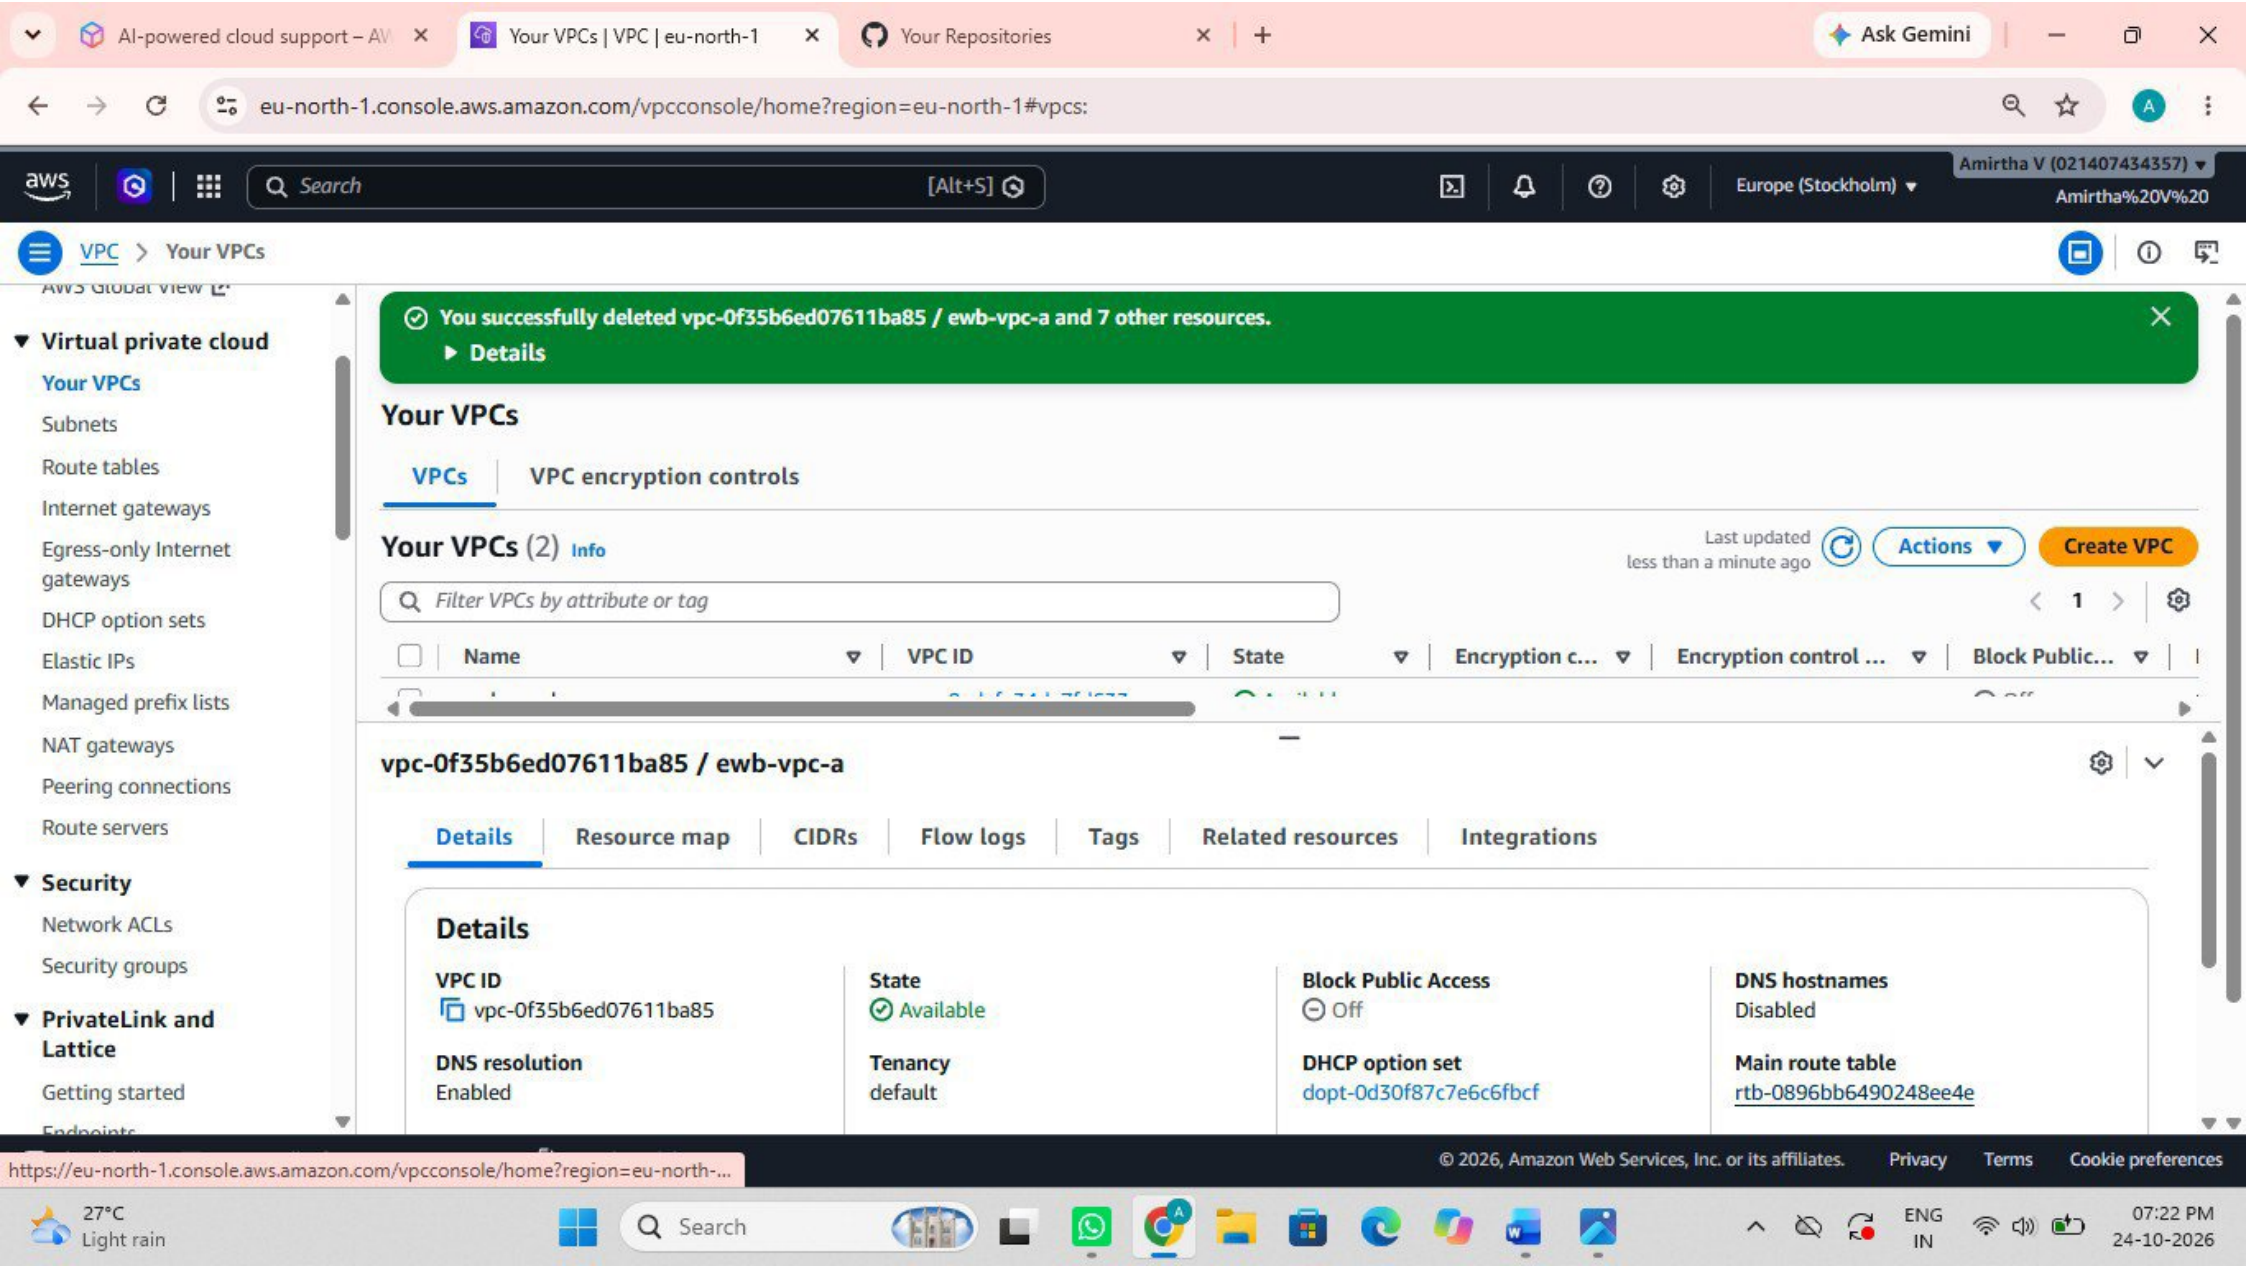

9. Troubleshooting

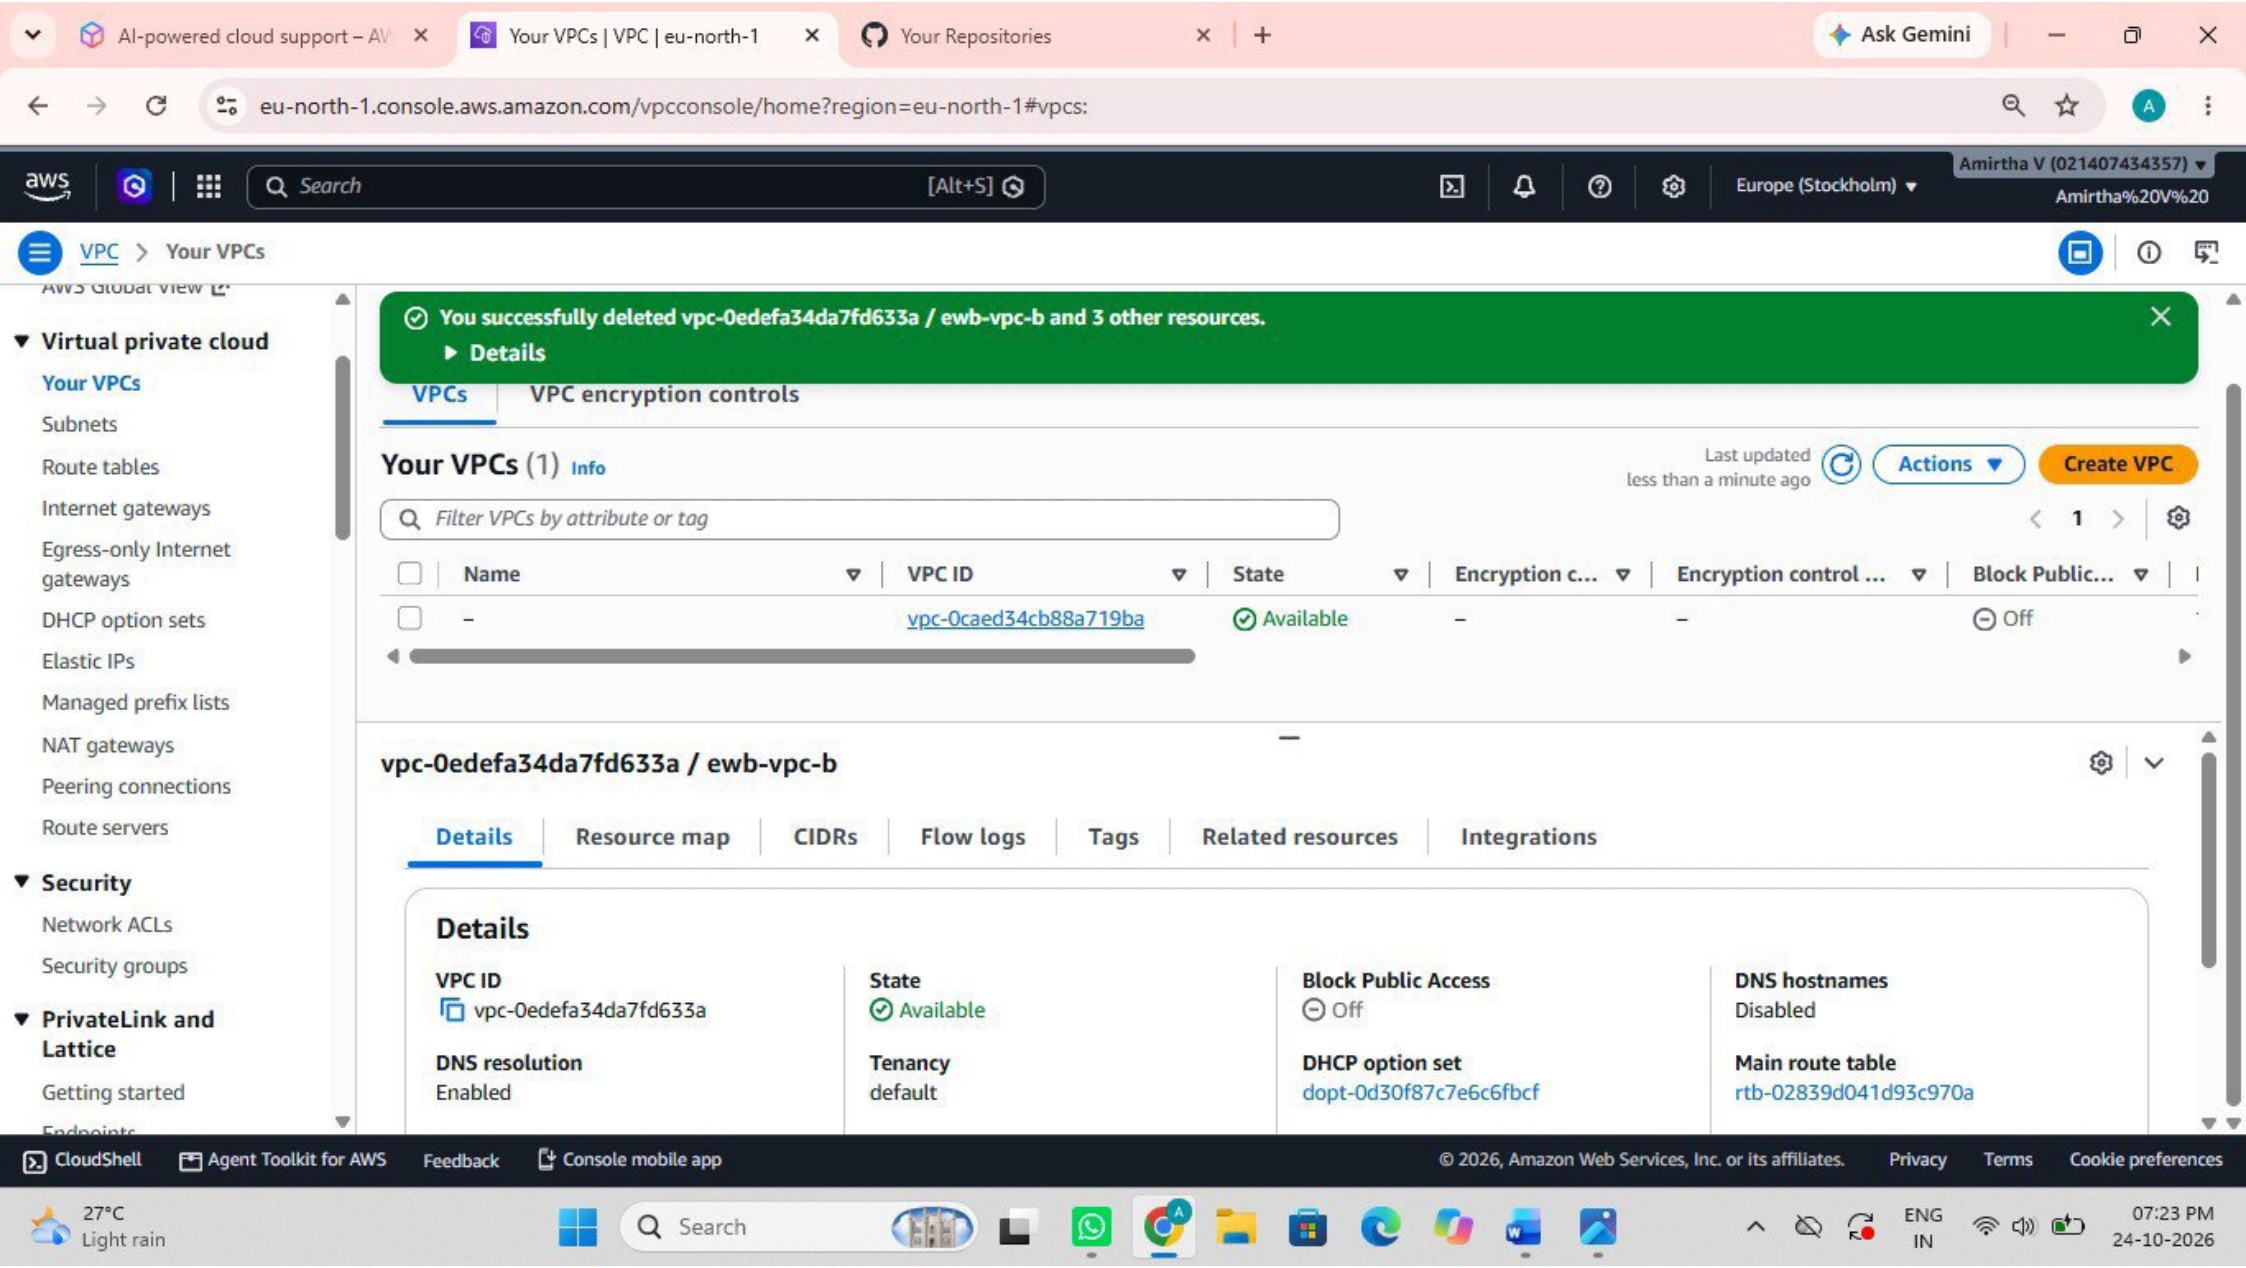

- Learned to check security group rules, route tables and VPC peering settings.
- Used logs and error messages to find and fix connectivity issues.
- Understood common problems like wrong routes, missing rules or peering not accepted.

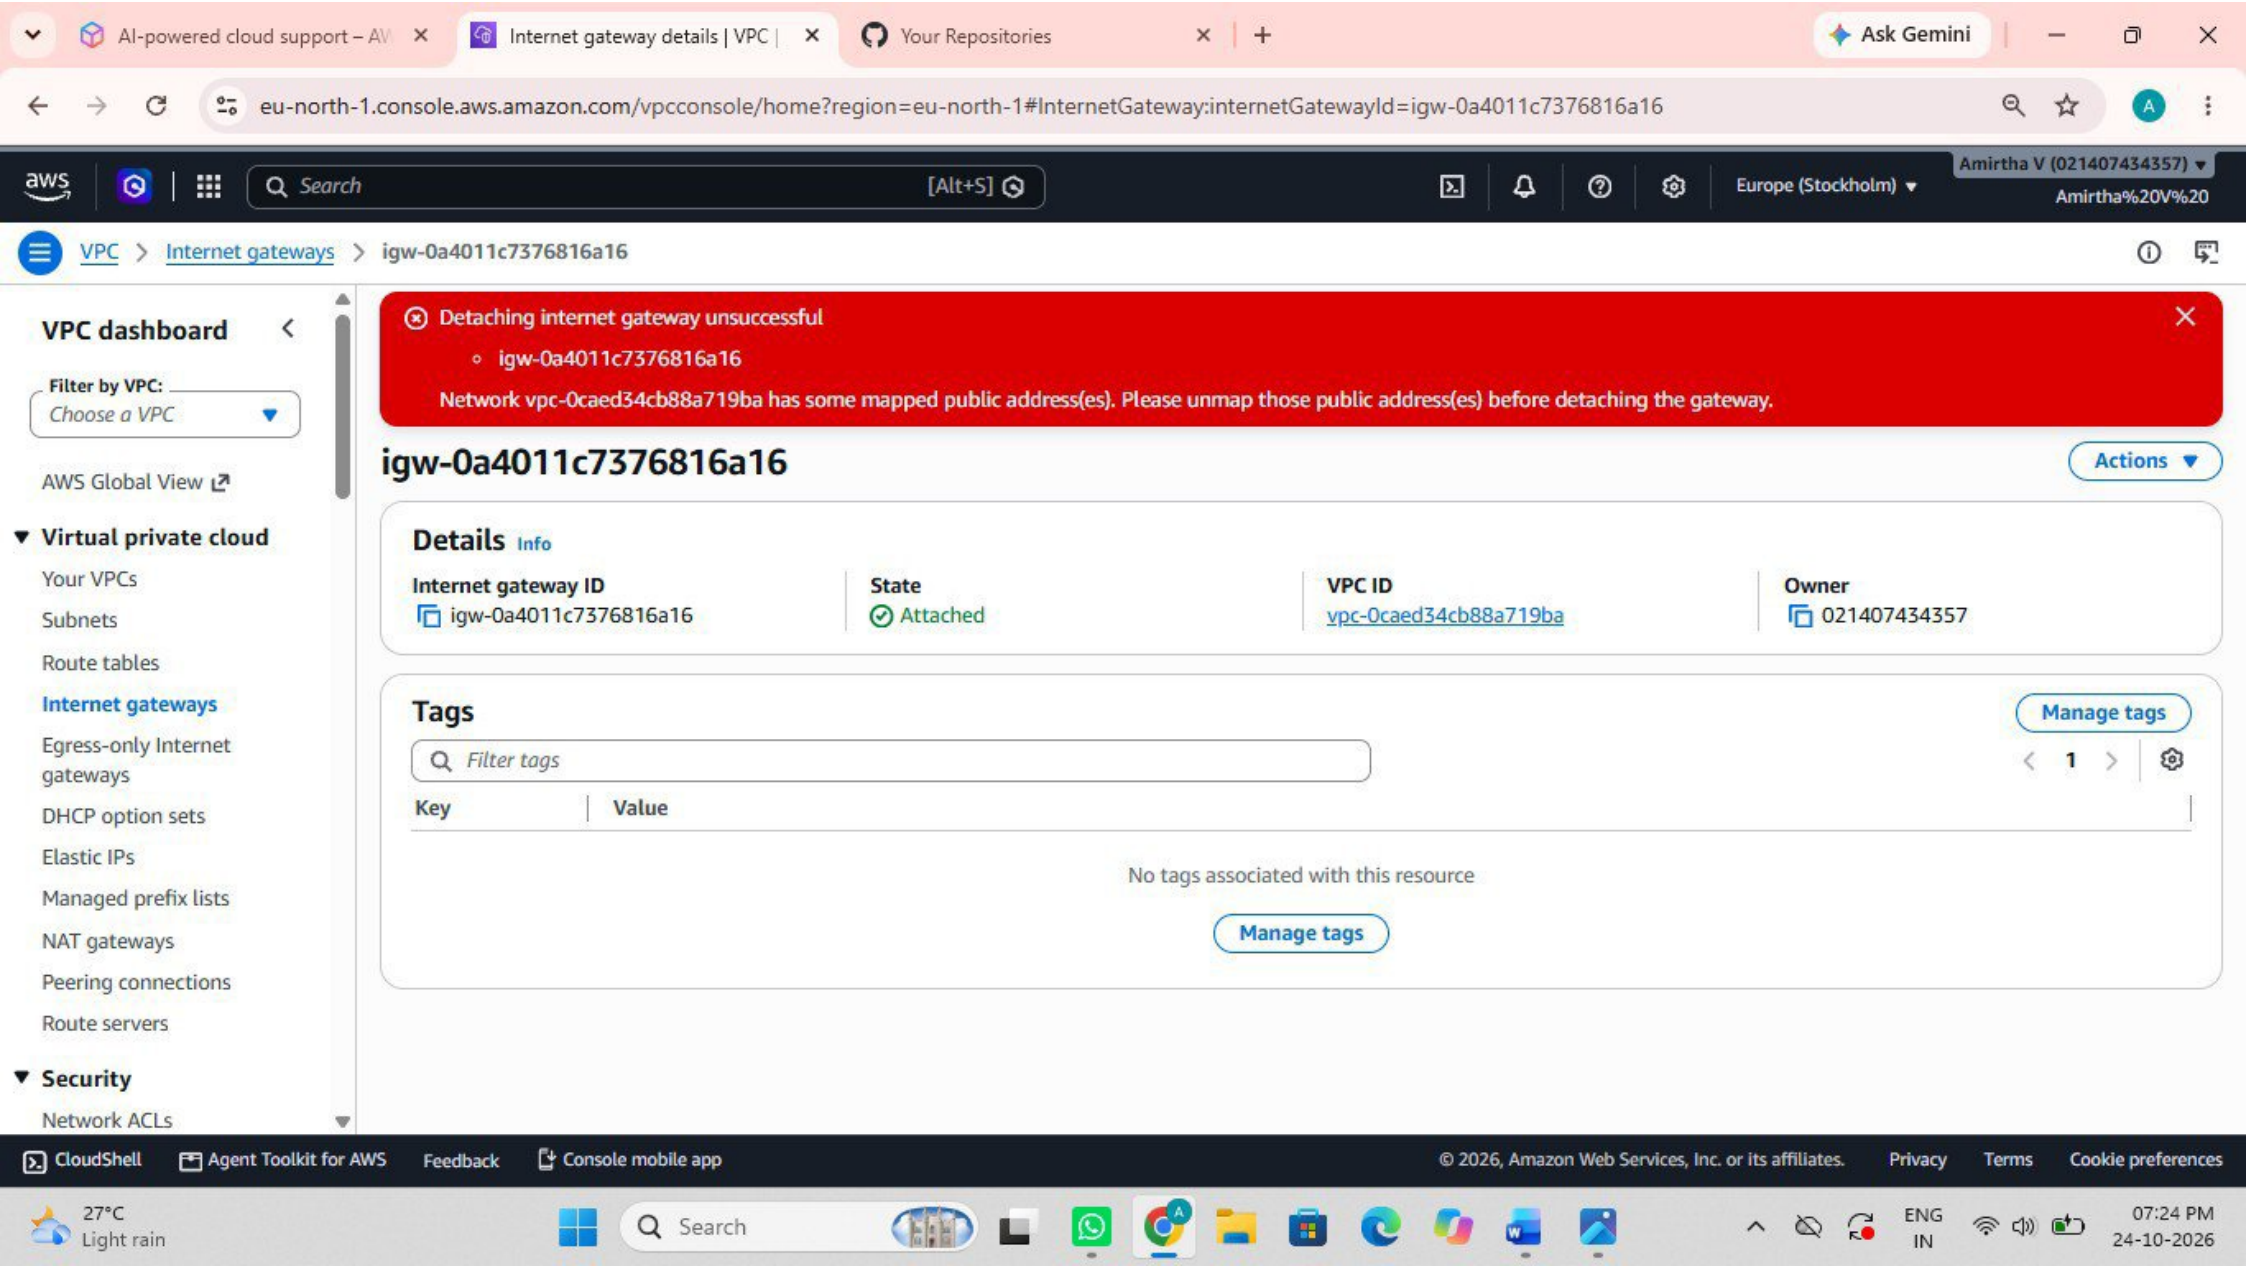

Overall

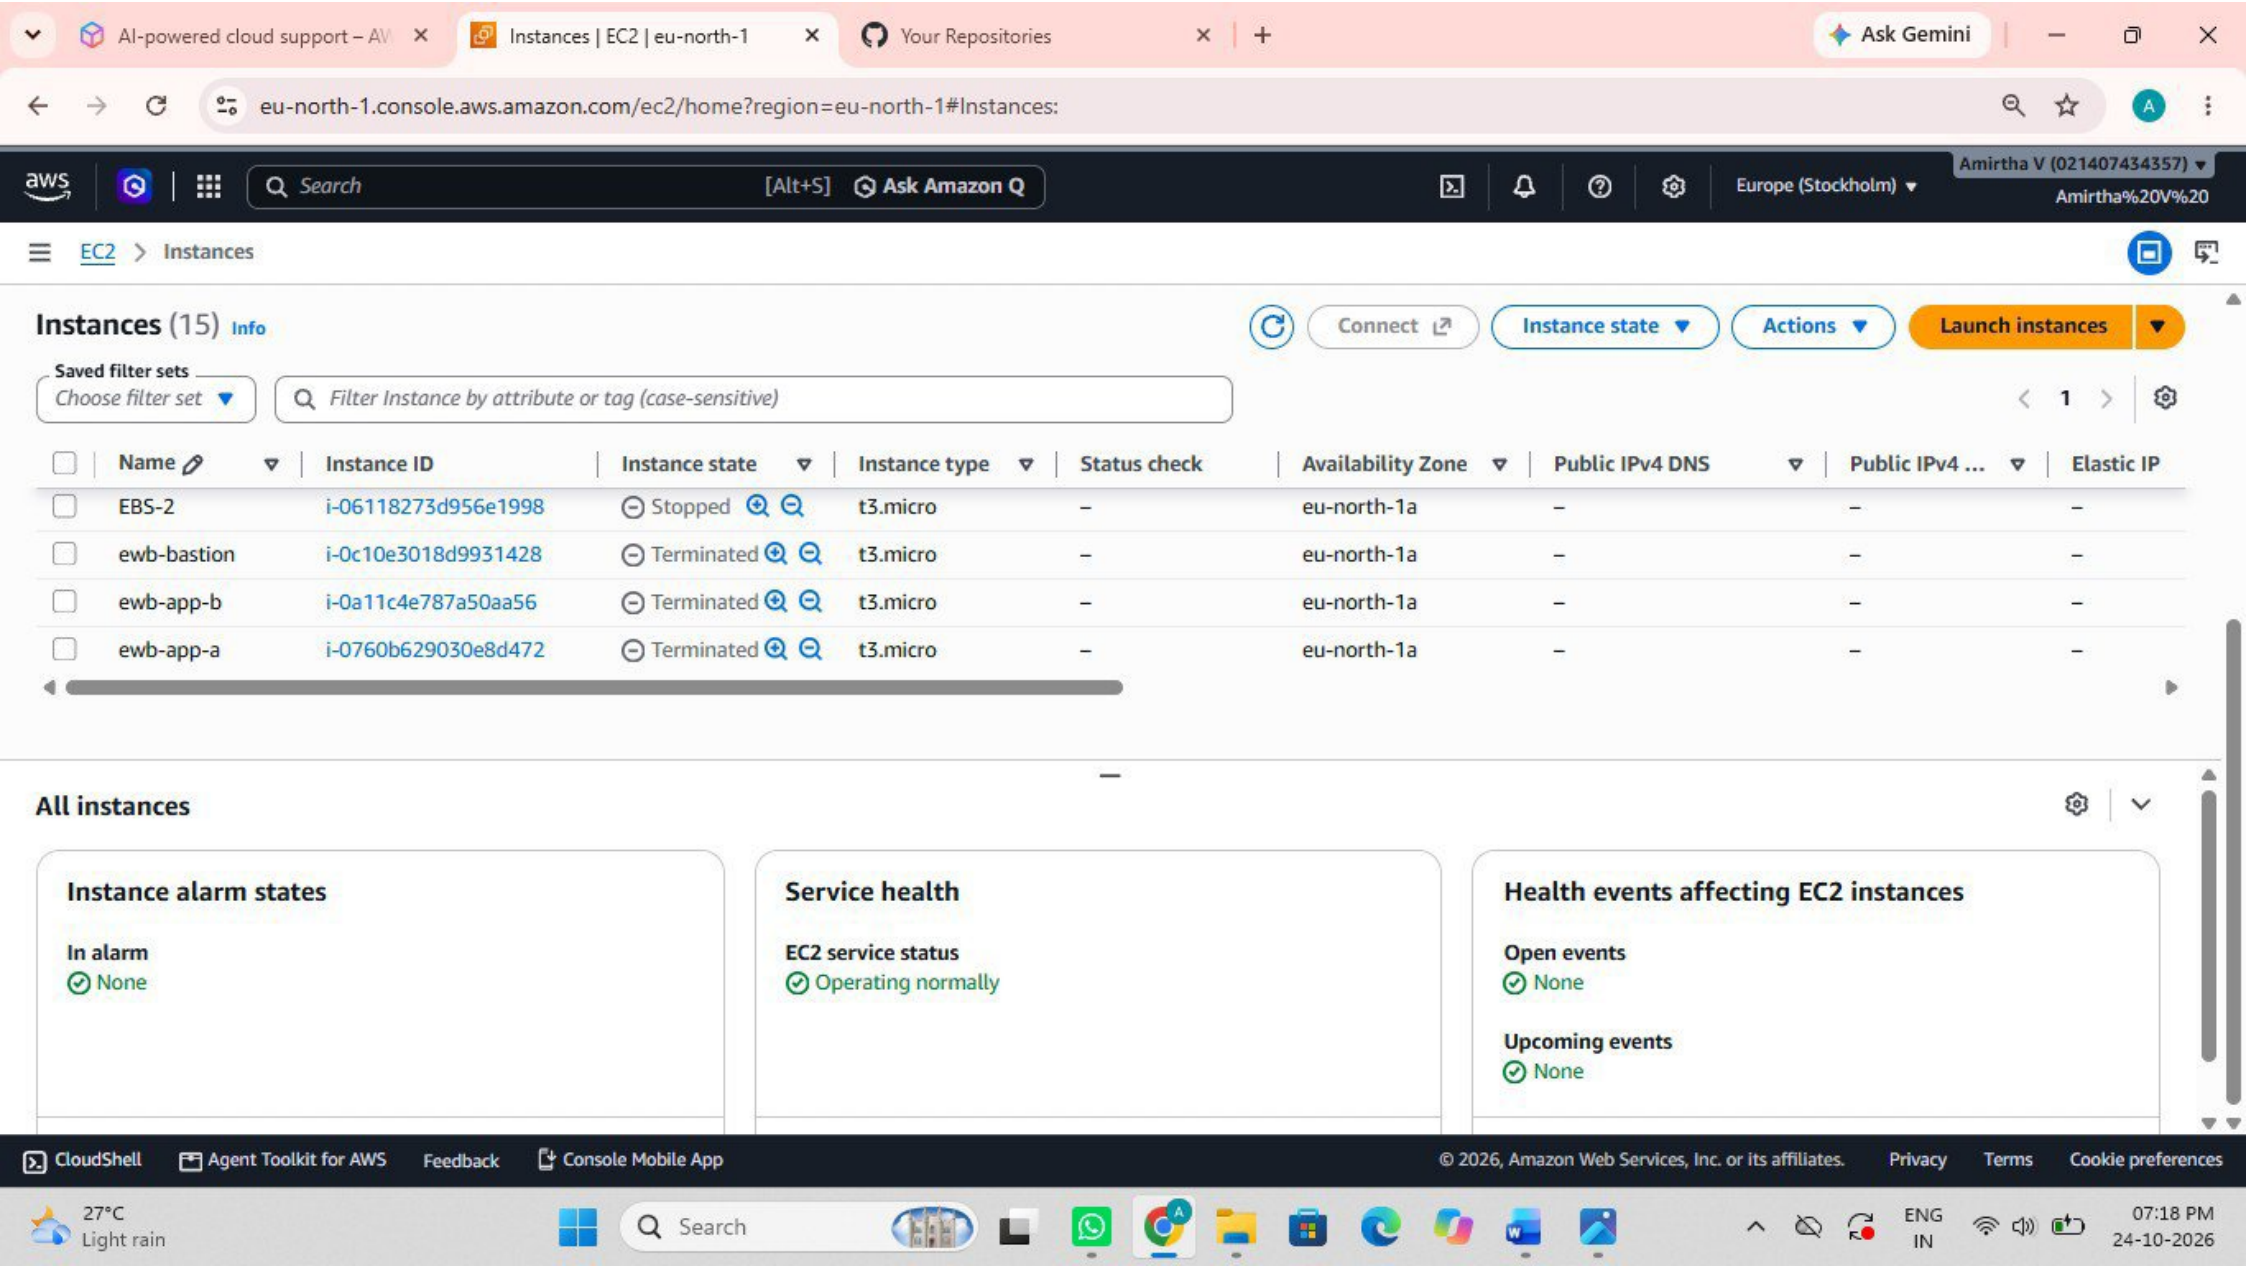

- Gained hands-on experience with AWS networking, security and troubleshooting, which helped me build a strong foundation in cloud infrastructure.
